Career Objective

An aspiring software engineer passionate about solving real-world challenges through secure full-stack web development and cybersecurity practices, with hands-on experience in MERN Stack, threat detection, and AI/ML pipelines — committed to delivering reliable, intelligent, and security-conscious applications.

Technical Skills

Programming Languages : Python, C++, Java (Basics)
Web Technologies : HTML5, CSS3, JavaScript, React.js
Databases : MySQL, MongoDB
Cybersecurity Skills : CIA Triad, Log Analysis, Threat Detection, File Integrity Monitoring, SIEM Fundamentals, Incident Response Basics, Network Security, Phishing Awareness
Academic Coursework : OOPS, DBMS, Computer Networks
Soft Skills : Effective Communication, Analytical Thinking, Quick Learner, Adaptability

Internships

AI & ML Intern — [SmartBridge \(APSCHE & Google for Developers India\)](#) Oct 2025 – Mar 2026 (Virtual)

- Applied supervised and unsupervised machine learning algorithms — data preprocessing, feature engineering, and model evaluation on real-world datasets using Python, Pandas, NumPy, and Scikit-learn.
- Built and deployed predictive models; documented performance metrics, accuracy reports, and analysis findings for structured review.
- Executed complete ML pipeline: data collection, cleaning, model training, hyperparameter tuning, validation, and result interpretation.

Full Stack Developer Intern (MERN Stack) — [SmartBridge Educational Services](#) Jul 2025 – Aug 2025 (Virtual)

- Enhanced full-stack web applications using React.js (frontend) and Node.js / Express.js (backend) with RESTful API integration.
- Designed and applied MongoDB database schemas; built responsive UIs connected to dynamic REST APIs.
- Participated in complete SDLC: requirement analysis, development, debugging, testing, and deployment of web modules.

Projects

File Integrity Monitor (FIM) — *Tech: Python, hashlib (SHA-256), os, json, datetime*

- Engineered a Python-based cybersecurity tool generating SHA-256 cryptographic fingerprints to detect unauthorized file modification, deletion, or addition — detecting changes as small as 1 character across 100+ monitored files.
- Implements the Integrity pillar of CIA Triad; mirrors enterprise FIM tools (Tripwire). Generated timestamped audit logs reducing incident response investigation time by 40%.

House Hunt App — *Tech: MongoDB, Express.js, React.js, Node.js (MERN Stack)*

- Built a full-stack real estate web application enabling users to search, filter, and browse 50+ property listings with a dynamic React.js frontend and Node.js / Express.js backend.
- Designed MongoDB schemas across 5+ collections; built 10+ RESTful API endpoints for listing creation, search filters, and user interactions with fully responsive UI.

Student Performance Analysis — *Tech: Python, Scikit-learn, Pandas, NumPy, Matplotlib*

- Built an ML-based system to predict student academic performance using Linear Regression and Random Forest achieving 88% model accuracy across a dataset of 300+ records.
- Performed data preprocessing on 10+ features; visualized 5+ key performance indicators with Matplotlib to identify factors influencing student outcomes.

Education

Bachelor of Technology in Information Technology

Vignan's Lara Institute of Technology and Science

CGPA: 8.5 / 10.0

2022 – 2026

Intermediate (MPC)

Narayana Junior College

Board of Intermediate Education, AP

Percentage: 90%

2020 – 2022

Secondary School Certificate (SSC)

Paparao Public School

Board of Secondary Education, AP

Percentage: 93%

2019 – 2020

Certifications

- Cybersecurity Essentials & Threat Management** — [Cisco](#) Instructor-Led, In-Person — Verified by Cisco Certified Professional
- Python Foundation Certification** — [Infosys Springboard](#) Online — Verifiable via infyspringboard.onwingspan.com
- Database Management Systems** — [NPTEL – IIT \(Govt. of India\)](#) 12-Week Course — Elite Certificate
- Programming in Java** — [NPTEL – IIT \(Govt. of India\)](#) Online — Verifiable via NPTEL portal
